

Supergame Technologies Private Limited

Your Outsourcing Partner

Supergame is a highly skilled IT solution provider with several cutting edge products and technologies. We have expertise on custom client-server solutions, multiplayer games and database solutions. We offer several products like gaming solutions, web crawlers, voice enabled services and smart card products.

Supergame is here to meet your software development needs. We offer a full product lifecycle service, underpinned by a solid business relationship, designed to give our customers the competitive edge which will enable them to excel in their domain.

Supergame's outsourced development team has been set up specifically to meet the demands of organisations looking for a reliable, long-term development partner who can work as an extension of their business activity, and add real value from day one

You have the option of deploying our services tactically or strategically, as your business model requires. The range of experience among our staff members is immense, and we are experts at complex core developments. Our business relationships are built on long-term commitment, trust, and years of expertise. We listen carefully to your requirements and expectations, then work to support your business objectives.

Why Supergame as your outsourcing partner?

Proven Expertise

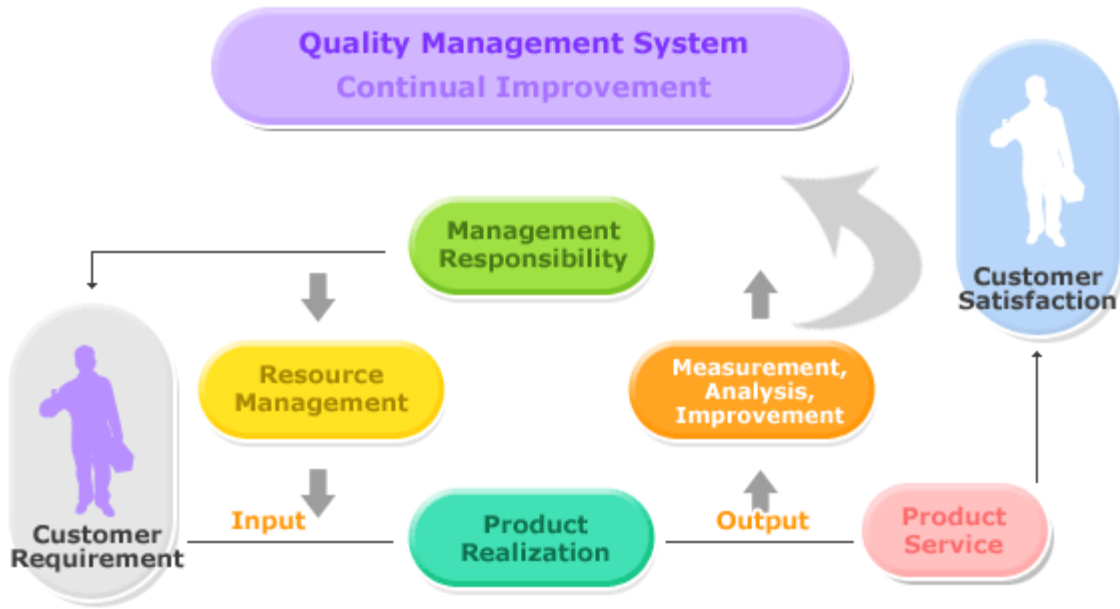

- ❖ Our high caliber staff reflects the vibrancy and innovation, supported by over 40 combined years of development experience, and specialized expertise in the areas of **Client Server Technologies**, Graphics Systems, Internet Technologies and User Interface Design.
- ❖ We have world class project managers who have driven J2EE Enterprise applications from start to deployment.

Knowledge Retention

- ❖ Our experts will still be available after the completion of a contract. The knowledge and skills gained while working on your projects remain accessible, ready for you to deploy again when required.
- ❖ A development partnership with Supergame means you get development consistency and continuity, with all its benefits:
 - The ability to accurately schedule developments
 - No recruitment fees and retraining costs
 - Reduced lead times
 - Better quality software
 - Lower long-term development costs

A Reputation for Service Excellence

- ❖ At Supergame we cultivate a culture of openness, teamwork and respect. This respect extends to our customers and their technical abilities. We are keen to understand and support your business goals and listen to your needs. We know that clear communication and management are key.
- ❖ We pride ourselves on being able to respond quickly and flexibly to our customers' requirements.
- ❖ Our project managers have worked across diverse cultures and different time zones. They are familiar with various quality processes like ISO 9000:2001 and CMM.

TQM

Management Know-how

- ❖ Our comprehensive service covers the full product lifecycle, enabling you to outsource with minimal management overheads
- ❖ We are dedicated to clear communication with you, the customer

Value for Your Money

Engagement model

Supergame offers various business models from “fixed bids” to “time and materials” to a “cost plus” model to provide clients with flexible options to meet their needs. This, coupled with a mixed model of onsite, offsite, and offshore resources and a single engagement person as a “point of contact,” makes it possible for clients to choose a mix that suits their requirement.
